EDUCATION

Earned a Bachelor of Science (Honours) in Computation and Management from the Faculty of Science, University of Peradeniya, Sri Lanka, with a focus on computational methods and management principles.

PROFESIONAL

Completed the Comprehensive Master Java Developer (CMJD) Diploma at the Institute of Software Engineering, specializing in advanced Java development techniques and best practices.

Reading for Mobile Application Development, Diploma – Institute of IT Guru

PROJECTS

Student Management System

Develop an entry-level student management system as part of my CMJD diploma first-course work. The mini-system allows users to manage university student details.

Library Management System

An efficient online library management system for book readers is being created as the second project for the CMJD diploma. This system will be a stand-alone application utilizing mySQL for the database, JavaFX for the UI, and a layered architecture.

Point of Sales(ERP System)

The Point of Sales (ERP) system is designed specifically for a manufacturing company, offering a comprehensive suite of services tailored to meet its operational needs. I developed this project using Java and Spring Boot for the backend, while the frontend is built with JavaScript, TypeScript, and React. Tailwind CSS was employed for efficient and responsive styling, creating a cohesive and modern user interface.

EXPERIENCE

IT Executive/Richard Peiris & Co. PLC

March 2024 - Present
